MANUAL

Auto Cancel Orders

v1.1.0

Description

The auto cancel orders module is a module which automatically cancels orders after a set period of time. As a result, the products of the cancelled order(s) will return to the inventory and be available for sales. The customer can be notified about the order cancellation. For registered customers, the products will be moved to the customer's shopping cart (optional).

Installation

The installation is the same as for any other module in Magento.

1. Decompress the module right in the root of your Magento installation.
2. Clear Magento cache. You might need to logout and login again in the backend.

The module will add a new section in System > Configuration. You can find the module under the Young-dogs header in the left bar. The module does not make any modifications in the frontend.

Configuration

Go to System > Configuration > Auto Cancel Orders

Auto Cancel Orders		Save Config
Configuration		
Enabled	No	[STORE VIEW]

Enabled: Set to “Yes” to enable the module.

When the module is enabled the following settings can be configured.
