MANUAL

Configurator Module
Custommade

Description

This technical configurator allows the technical product to be loaded with all variables and options. Depending on the selection the configurator calculates your price and shows relative options. Configuring your own technical product is easy and allows online users to calculate their price as they wish their product to be.

Installation

The installation is the same as for any other module in Magento.

1. Decompress the module right in the root of your Magento installation.
2. Clear Magento cache. You might need to logout and login again in the backend.

The module will add a new section in System > Configuration to configure your setting for the module.

Configuration

Depending on the module.
