MANUAL

Media Cleaner

v1.0.0

Description

After installing and enabling. The module will automatically remove all images from the hosting once a product is being deleted from the catalogue.

Installation

The installation is the same as for any other modules in Magento.

1. Decompress the module right in the root of your Magento installation.
2. Clear Magento cache.
3. If you have the compiler enabled, you will have to run the compilation process.
4. You might need to logout and login again in the backend.

The module will add a new section in System > Configuration -> YoungDogs -> Media Cleaner where you can disable or enable the functionality.

Magento media cleaner

Save Config

Configuration	
Enabled	<input type="text" value="No"/> [GLOBAL]

Enabled Enables/disables the module

Usage

When the module is enabled, all related images to a product are deleted from the server when the product is deleted in Magento .
